

Diana Silva

Summary

Software engineer building production serverless systems for local government. I design, build and maintain services across multiple AWS accounts that process financial data for multiple councils, handle 5 million+ case files for reporting, and monitor 400+ systems in real-time. I work across JavaScript/Node.js, Python, and C#/.NET with extensive AWS experience.

Technical skills

Languages	JavaScript/Node.js, Python, C#/.NET, HTML/CSS, SQL
AWS Services	Lambda, Step Functions, DynamoDB, RDS (MySQL/PostgreSQL), API Gateway, S3, CloudFront, Cognito, Bedrock, EventBridge, SES, SNS, CloudWatch, Secrets Manager, VPC, CloudFormation, Route 53
DBMS	DynamoDB, MySQL, PostgreSQL/PostGIS, SQL Server
Tools	Git, Docker, Terraform, SAM, PowerShell, VS Code
Practices	Serverless architecture, Infrastructure as Code, cross-account IAM, VPC networking, CI/CD, technical documentation

Experience

Software Engineer Starter	11/2024 - Current
West Northamptonshire Council (DDaT)	Northamptonshire, UK
- Built a direct debit system serving two councils - 350k customer validations, automated daily exports, runs unattended 24/7 - Processed 5M+ CRM case files into Power BI dashboards using Step Functions with 100 parallel workers (55k files/min) - Built an AI family support service - Bedrock generates action plans, auto-creates cases, sends encrypted tracking emails - Architected centralised staff authentication (Cognito) used by multiple live applications Detached 150 .NET modules from OutSystems to self-managed AWS, eliminating licensing costs - Implemented cross-account API Gateway unifying all council APIs under one domain - Documented every system with troubleshooting guides enabling independent maintenance	

Education

BSc Hons Computing and IT (Software) 2023 - Current
The Open University
Milton Keynes, UK

Community

Ambassador @GirlCode
01/2025 - Current

- Promoting mission and values
- Mentoring and guiding
- Representing the organisation at conferences and meetups
- Raising awareness about gender diversity in tech.
